 - [x] Feature: Analysis history page
 - [x] Feature: Markdown export
 - [x] Feature: Dark/light theme
 - [x] Feature: Database storage of analyses
-

REMAINING TASKS (Priority Order)

HIGH PRIORITY

- [] **Update Export API** (`/api/export/route.ts`)
- Currently references old format (frameworkAnalysis, suggestions array)
- Must export: componentScores, prioritizedFixes, transformationSummary
- Must include: present/missing lists, specific fixes, bestseller examples

MEDIUM PRIORITY

- [] **Update Home Page** (`app/page.tsx`)
- Remove multi-framework comparison cards
- Show only Principle-Based Hybrid with 4 components
- Update "How It Works" section

- [] **Update Analysis Detail Page** (`app/analysis/[id]/_components/analysis-detail-client.tsx`)
 - Update to render componentScores format
 - Display 4 component scores with present/missing/fixes
- [] **Deploy to Public URL**
 - Run deployment after all fixes
 - Verify production functionality

LOW PRIORITY

- [] **Add Re-Analysis Button** (analyze again without re-uploading)
- [] **Full End-to-End Test** (upload → analyze → view → export → history)

BUILD ORDER

1. **Export** API fix (🕒 30 min)
2. Home page update (🕒 20 min)
3. Analysis detail update (🕒 30 min)
4. Full test (🕒 15 min)
5. Deploy (🕒 10 min)

Total estimated time to 100%: ~2 hours
